

I understand that the FCC is considering a change so that LPFM's will take priority over regular FM stations. I listen almost exclusively to K-LOVE which is a national FM stations with a major satellite in Denver, CO. I believe thia station makes a considerable service to this community. I urge you to protect this station in this area. We support it financially and just need the opportunity to continue enjoying its influence on my community and my family.

Sincerely,

James Kelley
